Net Weight: 30g/p

Packing: 12pcs/paper box

Container Packing: 24boxes/paper box (288pcs/carton)

Size of outer carton: $43 \times 25 \times 15.5$ cm

[Components]

Surfactants, substance dispersing agent, emulsifier, essence, water

[Merits]

1. It is made of natural coconut oil compounded 12 kinds of non-ion surfactants, adding strong emulsifier Empicol and deterative potentiating agent HY. This product doesn't contain harmful chemical materials, such as phosphor and boron, etc. It can effectively clean out all dead-end dirtiness. Antibacterial and anti hypersusceptibility, it is very convenient for environmental protection. No harm to any clothes being cleaned.
2. It has strong capability of stain removal and can maintain the clothes tenderly. It combines four functions of polishing, maintain, decontamination and deodorization in one.
3. It is innocuous and no irritation, mild to people's skin. And it has fresh fragrance of natural lemon.

[Operation Guide]

1. This product adopts lipstick design. When using, directly coat the cream on the dirt surface of the clothes, then work with environmental protection laundry balls, and wash clean with water directly.
2. Coat stain stick on the surface of dirty mark, after 1~2minutes, and put into the washing machine to wash.
3. Must coat the stain stick on the stain surface of dry clothes. If coat on soaking wet clothes, that will have influence on deterative effects.

[Application]

Applied for any kind of color and texture leather and cloth
